

As VP of Operations, Mark brings over 20 year's experience in preparation of construction drawings and administering the bidding and construction process. In addition, Mark is an invaluable resource to clients and staff regarding state and local codes as well as his extensive knowledge of building systems and construction processes.

Mark is involved from the onset of a project until its completion providing construction cost and system analysis at every phase of design while focusing on scheduling milestones. His responsibilities include project scheduling, cost analysis, direct field observation and quality control while assisting with contractor negotiations and administration. Mark is very detail orientated and brings added value to every project. He is proficient in Auto Cad and Revit software programs.

Mark is a licensed Architect and has extensive experience in corporate retail, grocery stores and shopping centers as well as healthcare and mid-rise multi-family projects. He is a graduate of Texas Tech University.
